

MIGUEL MALONE LAZCANO

PROFESSIONAL SUMMARY

Versatile technologist with a strong blend of data-driven analysis and full-stack software developer experience. Skilled in Python, Java, SQL, R Studio, and statistical modeling. Proven track record of leading projects end-to-end from architecture and database design through implementation, deployment, and stakeholder communication.

SKILLS

- Programming & DevOps**
Java • Python • Git (familiar) • JIRA • Trello
- Databases & ETL**
Oracle • SQL Server • T-SQL • PL/SQL
- Data Analysis & Visualization**
pandas • NumPy • R Studio • Jupyter Notebook • Excel (advanced) • Tableau • Power BI (familiar) • Statistical forecasting • Access (familiar)

PROJECTS EXPERIENCE

- Operational Analysis & Forecasting**
 - Forecasted seasonal MRI demand using time-series methods; mapped processes to cut idle time by 25% and recommended staffing changes that boosted throughput 15%.
 - Built Excel-based models for breakeven cost comparisons, driving an equipment purchase decision.
- Database Design for NEA**
 - Architected and implemented a SQL Server schema for managing international student records; wrote T-SQL procedures for CRUD operations, complex joins, and batch updates.
 - Automated data loads via Python scripts, reducing manual ETL work.
- Medical Data Visualization** (Apr 2024)
Technologies Used: Tableau, Power BI, R Studio, Jupyter Notebook
 - Enhanced clarity and insight of flu-vaccination data across 20 clinics by developing interactive dashboards, leading to a increase in timely reporting and resource allocation.
- Statistical Film Data Analysis**
 - Analyzed 50 K+ film records to identify rating, length trends; surfaced a niche “under-3K-vote” segment that outperformed expectations by 18%.
- Python Log-Parsing Automation**
 - Developed Python scripts to parse and aggregate JSON server logs; delivered session-level metrics to the BI team, improving data availability for dashboarding from 2 days to 2 hours.

WORK EXPERIENCE

AI Intern

SBDC at Columbus State Community College (CSCC) — 09/2025–Present

- Assist Certified Business Advisors in helping small business clients integrate Artificial Intelligence tools to enhance marketing, streamline operations, and improve productivity.
- Conduct needs assessments and provides recommendations for AI implementation strategies aligned with client goals.
- Develop and deliver training materials to educate small business owners on practical AI applications.
- Support data tracking, client reporting, and documentation within the SBDC management system (Center IC).
- Complete Google AI Essentials certification and apply knowledge to client advising and automation projects.
- Maintain professional client engagement and uphold service standards, including 24-hour response metrics.

Team Leader

Midwest Acoust-A-Fiber Inc, DE — 07/2024–04/2025

- Led a cross-functional team of 6 in operations and quality control; set performance goals and delivered training that improved efficiency by 20%.
- Streamlined workflow systems and maintained production databases; coordinated with engineering and customer-support stakeholders to align on process improvements.
- Maintained database systems to track and analyze operational data.

Operations Assistant

A&R Creative Group, Columbus, OH — 09/2021–06/2024

- Managed document workflows and data-entry processes; partnered with business owners to define KPIs and built Power BI reports tracking project milestones.
- Managed day-to-day department operations with effective workflow coordination.
- Assisted operations manager with planning of routine operations and special projects.
- Supported daily operations by organizing office spaces for maximum functionality and ease of use.
- Provided administrative support with accurate document preparation and data entry.

Clinical Field Coordinator

Universidad Tecnológica De México, Guadalajara — 08/2017–01/2020

- Supported the development of proposals for new projects, showcasing company capabilities and highlighting past successes.
- Conducted monthly staff meetings to communicate program needs and scheduled activities.
- Developed comprehensive training programs for new staff members, improving overall team performance.
- Negotiated contracts with vendors, securing favorable terms for materials and services needed onsite.
- Optimized work schedules to accommodate project deadlines, ensuring timely completion of tasks.

EDUCATION

Columbus State Community College, Columbus, OH
Associate of Applied Science, Management Information Systems, Expected in 05/2026
Dean's List Spring, Summer, and Fall 2024

Software Developer Certificate, Expected, 05/2026

Architectural CAD Drafting Certificate, Expected 05/2026

Universidad Autonoma De Guadalajara, Mexico
Bachelor of Arts, Health Management & Clinical Assistance, 2017
